

REGIONAL COURSE
ON
PROJECT HYDROLOGY

COURSE MATERIAL

NATIONAL INSTITUTE OF HYDROLOGY
ROORKEE—247 667 (INDIA)

CONTENTS

PREFACE

I.	HYDROLOGIC SYSTEM	1 to 14
II.	DATA FOR HYDROLOGICAL ANALYSIS	1 to 100
	2.1 Data Requirements for Planning, Development and Operation of Water Resources Projects	1
	2.2 Observation of Hydrometeorological Parameters	20
	2.3 Processing of Rainfall Data	44
	2.4 Streamflow Measurements	49
	2.5 Processing and Analysis of Streamflow Data	58
	2.6 Observation and Processing of Sediment and Water Quality Data	84
III.	APPLICATIONS OF MODERN TECHNIQUES	1 to 45
	3.1 Use of Nuclear Hydrology in Project Planning and Monitoring	1
	3.2 Remote Sensing Applications in Project Hydrology	39
IV.	WATER RESOURCES ASSESSMENT	1 to 39
	4.1 Water Availability Analysis	1
	4.2 Water Balance Studies	23
V.	DESIGN FLOOD STUDIES	1 to 131
	5.1 Design Storm	1
	5.2 Empirical Formulae for Design Flood Estimation	30
	5.3 Design Flood Estimation Using Unit Hydrograph Techniques	40
	5.4 Design Flood Estimation by Frequency Analysis	76
	5.5 Design Flood Estimation for Basins with Limited Data	98
	5.6 Riverflow Routing	115
VI.	DESIGN CRITERIA	1 to 47
	6.1 Hydrological Studies for Barrage and Reservoir Planning	4
	6.2 Design Criteria for Preparation of Hydrologic Input for Design	33
VII.	HYDROLOGICAL ASPECTS IN OPERATION AND MAINTENANCE	1 to 123
	7.1 Reservoir Operation	1
	7.2 Reservoir Water Balance	18
	7.3 River Flow Forecasting	39
	7.4 Water Quality Modelling and Monitoring	56
	7.5 Environmental Impact Assessment	86
