

PREFACE

This publication, which is the proceeding of the National Symposium on “Water Resources Management in Changing Environment (WARMICE-2012)”, February 8-9, 2012, is an outcome of the valuable contributions made by various researchers, scientists, academicians, field engineers and managers, who are in some way or the other related with the water resources of different parts of India. We have made sincere efforts to put together the various research papers in proper prospective by arranging them into important themes so that the document serves as a useful ready reference for everyone and anyone from the policy maker to the stakeholder. The volume has been broadly divided theme wise in to seven sections namely (i) Surface Water Management in Changing Environment, (ii) Groundwater Management in Changing Environment, (iii) Management of Hydrological Extremes under Changing Climate, (iv) Environment and Water Quality Management, (v) Emerging Techniques in Water Resources-I, (vi) Emerging Techniques in Water Resources-II and (vii) Water Education and Capacity Building. We sincerely hope that this publication will go a long way in assisting the various related individuals and organizations, in the cause of development, conservation and management of the water resources.
