<b>List of Figures</b>	<b>v</b>
<b>List of Tables</b>	<b>ix</b>
<b>List of Abbreviations</b>	<b>xiii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Background . . . . .	1
1.2 Importance of springs and government's initiatives . . . . .	2
1.3 Spring data availability and collection approach . . . . .	4
1.4 Need of streamlining the efforts for springshed management . . . . .	11
1.5 Capacity building in the domain of springshed management . . . . .	11
1.6 Conclusion . . . . .	12
<b>2 Spring and Its Various Classifications</b>	<b>17</b>
2.1 Background . . . . .	17
2.2 What is spring? . . . . .	17
2.3 Geometry of spring . . . . .	21
2.4 Classifications of springs . . . . .	22
2.4.1 Classification on the basis of spring flow . . . . .	23
2.4.2 Classification on the basis of geo-hydrological conditions . . . . .	24
2.4.3 Classification on the basis of types of lithologies . . . . .	26
2.4.4 Classification on the basis of average discharge . . . . .	26
2.4.5 Classification on the basis of seasonality of flow . . . . .	28
2.4.6 Classification on the basis of chemical composition of the spring's water . . . . .	28
2.4.7 Classification on the basis of calculated Discharge Variability Ratio (DVR) . . . . .	29

## Contents

---

2.4.8	Classification on the basis of spring's water temperature . . .	30
<b>3</b>	<b>Sequential Steps for Comprehensive Spring Mapping and Survey</b>	<b>31</b>
3.1	Background . . . . .	31
3.1.1	Data mining and compilation . . . . .	33
3.1.2	Level I field survey . . . . .	34
3.1.3	Level II field survey . . . . .	36
3.1.4	Level III field survey . . . . .	37
<b>4</b>	<b>Springshed Monitoring and Data Collection</b>	<b>39</b>
4.1	Background . . . . .	39
4.2	Springshed parameter . . . . .	40
4.3	Instrumentation of springshed . . . . .	41
4.3.1	Flume . . . . .	43
4.3.2	Automatic Weather Station setup . . . . .	46
<b>5</b>	<b>Springshed Management Methodology</b>	<b>51</b>
5.1	Background . . . . .	51
5.2	The concept of a springshed . . . . .	52
5.3	Springshed Management: a methodology that integrates various disciplines . . . . .	53
5.3.1	Comprehensive Approach: identifying, mapping, classifying Springs and landscape and Hydrogeological delineation of aquifer systems for recharge area identification . . . . .	56
5.3.2	Monitoring springs by measuring rainfall, spring discharge and water quality . . . . .	59
5.3.3	Developing social and governance systems related to springs . . . . .	60
5.3.4	Developing springshed management, governance interventions and protocols . . . . .	60
5.3.5	Monitoring springshed protection, restoration and spring re-viving impact . . . . .	61
5.4	Conclusion . . . . .	61
<b>6</b>	<b>Spring Water Quality Monitoring and Analysis</b>	<b>63</b>
6.1	Background . . . . .	63
6.2	Flowchart for spring water quality monitoring . . . . .	64
6.3	Spring water sampling network selection . . . . .	64
6.4	Spring water sampling . . . . .	66

6.4.1	General guidelines for spring sampling . . . . .	69
6.4.2	Sample preservation and transport . . . . .	73
6.5	Laboratory work . . . . .	73
6.6	Data management . . . . .	78
6.7	Quality Assurance (QA)/Quality Control (QC) . . . . .	78
6.8	Spring water quality data analysis for hydrogeological processes . . . . .	79
6.9	Hydrochemistry and sources of ions in spring water . . . . .	81
6.10	Remedial measures for increasing water quality standard of spring water . . . . .	86
6.11	Data compilation and sharing . . . . .	88
6.11.1	Data compilation . . . . .	89
6.11.2	Data sharing . . . . .	89
<b>7</b>	<b>Application of Environmental Isotopes in Hydrology of Springs</b>	<b>91</b>
7.1	Background . . . . .	91
7.2	Scopes and limitations of the application of environmental isotopes . . . . .	92
7.3	Stable isotope compositions and calculation method . . . . .	93
7.4	Seasonal variability of isotopic signatures in rainfall and springs . . . . .	93
7.5	Sampling protocol . . . . .	94
7.6	Delineation of spring recharge elevations . . . . .	95
7.7	Age determination of spring water . . . . .	99
<b>8</b>	<b>Treatment Measures for Springshed Management</b>	<b>101</b>
8.1	Background . . . . .	101
8.2	Vegetative measures . . . . .	101
8.3	Soil moisture conservation and slope stabilization through native grasses	104
8.3.1	Species selection . . . . .	108
8.3.2	Methods of propagation . . . . .	108
8.3.3	Planting . . . . .	109
8.3.4	Plantation along the contours . . . . .	110
8.3.5	Model estimates for plantation . . . . .	110
8.4	Engineering measures . . . . .	111
8.4.1	Major steps for bio-engineering measures . . . . .	113
8.4.2	Main springshed recharge structures . . . . .	114
8.4.3	Precautions while selection of sites for engineering measures . . . . .	122

<b>9 Hydrological Analysis of Spring Flow for Sustainable Springshed Management Programme</b>	<b>125</b>
9.1 Background . . . . .	125
9.2 Discharge measurement . . . . .	126
9.3 Understanding aquifer characteristics through discharge pattern . . .	126
9.3.1 Spring hydrograph . . . . .	126
9.3.2 Spring flow variability . . . . .	130
9.3.3 Depletion time . . . . .	131
9.3.4 Determination of depletion time . . . . .	132
9.3.5 Aquifer recharge . . . . .	132
9.4 Assessment of springshed programme: A case study of Sikkim state .	133
9.4.1 Study area and data used . . . . .	133
9.5 Assessment of minimum storage requirement for sustainable use of spring water . . . . .	138
9.6 Sustainability . . . . .	140
9.7 Conclusion . . . . .	141
<b>10 Impact Assessment in Springshed Management</b>	<b>143</b>
10.1 Background . . . . .	143
10.2 Baseline surveys . . . . .	143
10.3 Impact of the SSM project . . . . .	144
10.3.1 Ecological impact . . . . .	145
10.3.2 Economic impact . . . . .	147
10.3.3 Social impact . . . . .	148
10.3.4 Sustainability of the program . . . . .	149
10.3.5 Monitoring and verifying mechanisms . . . . .	151
<b>11 Capacity Building in the Field of Springshed Management</b>	<b>155</b>
11.1 Background . . . . .	155
11.2 Methodology . . . . .	157
11.2.1 Identified challenges: Issues for capacity building . . . . .	158
11.2.2 Stakeholder wise identified gaps for capacity building . . . . .	160
11.2.3 Mechanisms for effective capacity building . . . . .	161
11.2.4 Capacity building materials . . . . .	163
<b>Annexures</b>	<b>165</b>
