

LIST OF TABLES

Table No.	Title	Page No.
1.1	Major tributaries of Narmada River	6
1.2	List of observatories in and around Narmada Basin	9
2.1	Design storms recommended for Narmada Sagar and Sardar Sarovar	11
2.2	Data availability	13
2.3	Salient features of the cross-sections of River Narmada	13
2.4	The parameters defining rating curves for various sites	14
3.1	Salient features of various catchments of the sub-zones 3(b) and (c)	21
3.2	Regional parameters for the sub-zones 3(b) and (c)	25
3.3	Growth Factors (Q_T/Q) for the subzones 3(c) and (c)	25
3.4	Geomorphological characteristics for all the three catchments	33
4.1	Final parameters for Kolar basin	44
4.2	Comparison of observed and simulated runoff volume for typical floods of Ginnore sub-basin	56
5.1	Values of calibrated Clark model parameters T_c and R used in the stream network model	62
5.2	Values of calibrated Muskingum K used in the stream model	63
6.1	Recommended rule curve levels (m) for Bargi reservoir	72
6.2	Initial rule curve levels (m) for Tawa Reservoir	74
6.3	Recommended rule curve levels (m) for Tawa Reservoir	75
8.1	Geomorphological parameters based on linear aspects	88
8.2	Geomorphological parameters based on Areal aspects	89
8.3	Geomorphological parameters based on Relief aspects	89
8.4	Computed direct runoff and error of prediction	97
10.1	Coefficients of quality-quantity relationships for various water quality determinants	108
11.1	Summary results of infiltrometer tests	112
11.2	Particle size analysis	113
11.3	Permeability and degree of saturation for Kolar basin	114
11.4	The moisture retention characteristics representing relationship between moisture tension and moisture content	115
12.1	Cumulative impacts on crop yield and cropped area	122
