Preface	i
Executive Summary	v
LIST OF TABLES	vi
LIST OF FIGURES	vii
SOME OF THE IMPORTANT RECOMMENDATIONS	vii
 1.0 NARMADA BASIN	 1
1.1 The River	1
1.2 The Narmada Basin	6
1.2.1 Climate	8
1.2.2 Soils	8
1.2.3 Land use	8
1.2.4 Raingauge network	8
1.2.5 Meteorological observatories	8
1.2.6 Stream gauge network	9
 2.0 DATA PROCESSING AND ANALYSIS	 10
2.1 Study of the Hydrometeorological Aspects of Narmada Basin	10
2.1.1 Synthetic design storm for Narmada Sagar and Sardar Sarovar	10
2.1.2 Summary of the moving storm studies	11
2.1.3 Recommendations	12
2.2 Rating Curves for Some of the Gauging Sites on Narmada River	12
2.3 Hydrological Network Design for Narmada Basin	15
2.4 Hydrological Data Book for Narmada Basin (upto Bargi Dam - 1981-90)	15
2.5 Spatial Disaggregation of Rainfall Data	16
2.6 Processing of Hydrological Data for Manot Sub-basin using HYMOS	17
2.7 Remarks	18
 3.0 SMALL CATCHMENT HYDROLOGY	 20
3.1 Regional Flood Frequency Studies	20
3.1.1 Data used	21
3.1.2 Methodology	21
3.1.3 Development of regional flood frequency curves	23
3.1.4 Estimation of T-year flood using at-site mean	23
3.1.5 Development of relationship between mean annual peak flood and catchment area	24
3.1.6 Development of regional flood formulae	24
3.1.7 Analysis and discussion of results	25
3.2 Geomorphological Instantaneous Unit Hydrograph (GIUH) Studies	26

3.2.1	Derivation of GIUH for small catchments for upper Narmada and Tapi Subzone 3 (c)	32
3.3	Relationship Between Frequency of Rainfall and Frequency of Flood for a Catchment of Upper Narmada and Tapi Subzone 3(c)	36
3.4	Remarks	37
4.0	HYDROLOGICAL MODELLING	38
4.1	Application of Event Based Models	39
4.1.1	Development of event based distributed rainfall-runoff model	39
4.1.2	Application of WAHS model to Kolar basin	39
4.2	Application of Continuous Models	41
4.2.1	Application of SHE model to six sub-basins of Narmada basin	41
4.2.2	Application of Tank Model in two sub-basins of Narmada basin	55
4.3	Application of BATS Model	56
4.4	Remarks	57
5.0	DESIGN FLOOD STUDIES	59
5.1	Deterministic Approach	59
5.2	Statistical Approach	59
5.3	Remarks	68
6.0	RESERVOIR OPERATION STUDIES	69
6.1	Multiobjective Optimization of Operation of Bargi Dam	69
6.1.1	Recommended Conservation Operation Procedure for Bargi Reservoir	71
6.2	Development of Operation Policy for Tawa Dam	73
6.3	Remarks	75
7.0	DAM BREAK STUDIES	76
7.1	Sensitivity Analysis of NWS DAMBRK Model for the Bargi Dam	78
7.1.1	Data availability	78
7.1.2	Methodology	78
7.2	Dam Break Study of Barna Dam	80
7.3	Remarks	84
8.0	APPLICATION OF REMOTE SENSING, GIS AND GEOMORPHOLOGY	85
8.1	Geomorphology of Kolar sub-basin for Hydrological Studies	85
8.2	Fluvial Geomorphological Characteristics of Four Sub-basins of Upper Narmada	87
8.3	Land Capability Classification in a part of Narmada Basin	90
8.4	Integration of GIS and Remote Sensing in soil Erosion Studies	92
8.5	Runoff Modelling Using SCS Method	96
8.6	Application of Remote Sensing Techniques for Water logging Studies in Tawa Command area	96
8.7	Remarks	98

9.0 GROUND WATER ANALYSIS AND MODELLING, WATERLOGGING, AND DRAINAGE	99
9.1 Ground Water Balance before Introduction of Irrigation in the Canal Command Area	99
9.2 Identification of Aquifer Parameter in Narmada Basin	101
9.2.1 Development of Methodologies	102
9.2.2 Application	102
9.3 Processing of Ground Water Data	102
9.4 Groundwater-Tank Interaction in Jabalpur District	104
9.5 Remarks	104
10.0 WATER QUALITY STUDIES	106
10.1 Prediction of Water Quality Parameters using Statistical Approach in Upper Narmada Basin	106
10.1.1 Quality - Quantity Relationship	107
10.1.2 Frequency Distribution	107
10.1.3 Regression Based Modelling	109
10.2 Identification of Sampling Sites for Water Quality Monitoring	109
10.3 Remarks	110
11.0 FIELD AND LABORATORY INVESTIGATIONS	111
11.1 Field Investigations in Kolar sub-basin of River Narmada	111
11.1.1 Infiltrometer Tests	111
11.1.2 Land use and soil maps	112
11.1.3 River cross-sections	113
11.2 Laboratory Analysis of Soil Samples from Kolar Sub-basin of River Narmada	113
11.2.1 Particle size distribution	113
11.2.2 Permeability	114
11.2.3 Retention curves	114
11.3 Infiltration Study of a Basin	115
11.4 Estimation of Hydrological Soil Properties of Narsingpur District	119
11.5 Remarks	119
12.0 DROUGHT STUDIES	120
12.1 Drought Studies	120
12.1.1 Drought impacts on agriculture - case study	120
12.2 Forecasting of Low Flows for River Narmada at Mortakka	123
12.3 Remarks	125
13.0 CONCLUDING REMARKS	126
APPENDIX - I : List of Technical Reports of NIH	127
APPENDIX - II : List of Papers Published/Accepted	130
APPENDIX - III : List of Organisations provided the data, etc.	133
