

International Seminar

# Hydrology of Extremes

(Floods & Low Flows)

## PROCEEDINGS

Sponsored by  
UNESCO AND INDIAN NATIONAL COMMITTEE ON  
HYDROLOGY

Co-sponsored by  
INTERNATIONAL ASSOCIATION OF HYDROLOGICAL  
SCIENCES  
INTERNATIONAL ASSOCIATION FOR HYDRAULIC  
RESEARCH  
INTERNATIONAL WATER RESOURCES ASSOCIATION

Organised by  
NATIONAL INSTITUTE OF HYDROLOGY ROORKEE (INDIA)

December 1-3, 1988  
Roorkee (India)

## CONTENTS

Page No.

### THEME 1 : EXTREME STORMS AND EXTREME FLOODS

1. Paleoflood Hydrology of Tropical Rivers—V. R. Baker 1-10
2. An Analysis of Extreme Rainfalls on Northern Italy—V. Anselmo and V. Villi 11-18
3. The Bay of Bengal Depression of September 1986 that Caused Deluge in West Bengal—A Case Study—Ranjit Singh and S. R. Roy 19-28
4. Moderating Outliers in Rainfall Frequency Analysis—D. S. Upadhyay and Surinder Kaur 29-43

### THEME 2 : FLOOD FREQUENCY ANALYSIS

1. Sundry Averages Method (SAM) for fitting Log-Pearson 3 Distribution—B. Bobée and F. Ashkar 45-51
2. Comparative Study of Different Parameter Estimation Techniques for EV-1 Distribution —N. K. Goel and S. M. Seth 53-63
3. Versatile Flood Frequency Methods with Enhanced Reliability—K. P. Singh 65-76
4. Application of LP3 Distribution to Censored Samples—H. N. Phien and Y. J. Hsiung 77-87
5. Uncertainties in Probabilistic Modelling of Floods—F. T. Mathew and M. M. Hasija 89-97

### THEME 3 : REGIONAL FLOOD FREQUENCY ANALYSIS

1. Flood Estimation using Regional Flood Frequency Analysis—R. J. Garde and U. C. Kothyari 99-109
2. Regional Flood Frequency Studies for Kerala—S. A. Saseendran, K. E. Sreedharan, K. Ratnakumari, E. J. James and M. Jayakumar 111-118
3. Regional Flood Frequency Studies through Regional Unit Hydrograph—Rajan Nair and R. K. Gupta 119-134
4. Flood in Arid Zone—A Case of Iran—Abdolah Koshan, Manouchehr Mahjoub and Taghi Mashayekhi 135-143

### THEME 4 : MODELLING OF FLOODS AND FLOOD DAMAGE ASSESSMENT

1. Surface Runoff Modelling of Small Watersheds—B. Vasudeva Rao and E. Panakala Rao 145-155
2. Flood Modelling in Bangladesh—A. Verwey, K. Havnoe and J. C. Refsgaard 157-169
3. Flood Forecasting using Radar Rainfall Estimates—J. R. Donald, E. D. Soulis, N. Kouwen and E. A. McBean 171-183
4. Flood Damage Computation in Urban Area—A Case Study—B. S. Thandaveswara 185-196
5. Impact of 1987 Flood on FCD Projects—M. Shahjahan and A. N. H. Akhtar Hossain 197-207

## THEME 5 : FORECASTING OF FLOODS

- |   |         |
|---|---------|
| 1. Structure of a System for On-line Flood Forecasting—C. Corradini, F. Melone and L. Ubertini          | 209-216 |
| 2. Flash Floods and their Forecasting—A few Case Studies—Ranjit Singh, K. Alda and S. G. Bhosale        | 217-226 |
| 3. Multi-day Stream Flow Forecasting using the Kalman Filter Model—Murray Fitch and Edward McBean       | 227-233 |
| 4. A Bivariate Model for Real Time Flood Forecasting—P. F. Krstanovic and V. P. Singh                   | 235-245 |
| 5. Forecasting of River Flows using a CARMA Model—N. Udaysen and Edward McBean                          | 247-262 |
| 6. Real-Time Flood Forecasting using Hydrometeorological Model—S. A. Wasimi                             | 263-275 |
| 7. Flood Forecasting for the Lower Indus River—H. N. Phien, N. C. Austriaco and A. Pornprasertsakul     | 277-287 |
| 8. Relative Performance of Regional Flood Prediction Models—S. H. Moharram, B. P. Parida and P N Kapoor | 289-301 |

## THEME 6 : LOW FLOWS

- |   |         |
|---|---------|
| 1. Agricultural, Meteorologic and Hydrologic Drought Relations—K. P. Singh and G. S. Ramamurthy   | 303-314 |
| 2. Preliminary Analyses of Low Flow Characteristics of Ungauged Catchments—R. J. Nathan, K. C. Gan, N. Jayasurya, T. A. McMahon and I. C. O'Neill     | 315-330 |
| 3. Low Flow for Mini Hydro Power Plants—P. Manciola and S. Casedei  | 331-342 |
| 4. Drought Identification using Streamflows—S. Mohan and N. C. V. Rangacharya   | 343-357 |
| 5. Characteristics of Hydroclimatic Extremes in West Africa: The Lessons from the Consequences of the Recent Climatic and Hydroclimatic Events—O. Ojo | 359-369 |

## THEME 7 : STATISTICAL ANALYSIS OF DROUGHT AND LOW FLOWS

- |   |         |
|---|---------|
| 1. On Drought Analysis of Periodic—Stochastic Process—Pedro Guerrero-Salazar                                    | 371-382 |
| 2. Drought Analysis and Synthetic Generation—Mandakinee Majumdar  | 383-388 |
| 3. MPS Method for Frequency Analysis of Low Flows—A. R. Rao and C. H. Hsieh                                     | 389-399 |
| 4. Stochastic Modelling of Low Flows in Mahanadi Basin—P. Govinda Rao   | 401-405 |
| 5. Forecasting of Non-monsoon Flows for River Mahanadi at Hirakud—S. M. Seth and R. D. Singh                    | 407-415 |
| 6. Analysis of Streamflow Drought in Krishna Basin—A Case Study—V. K. Lohani, N. S. Raghuvanshi and P. K. Verma | 417-428 |

## THEME 8 : GENERAL ASPECTS OF FLOODS AND LOW FLOWS

- |  |         |
|--|---------|
| 1. An Integrated Strategy for Water Conservation and Development for Drought Extremes—B. H. Brizkishore                          | 429-445 |
| 2. Evaluation of Source Potential by Simulation Methodology—M. K. Gokhale  | 447-458 |
| 3. Exchange of Flow between a River and Aquifer System—G. C. Mishra  | 459-474 |
| 4. Prediction of the Effects of Ground Water Abstraction on Low Flows in a Moraine Catchment—J. C. Refsgaard and G. H. Jorgenson | 475-486 |
| 5. Impact of Afforestation on Storm Flows—A. M. Kalra, Satish Kumar and B. P. Parida   | 487-495 |
| 6. Chemical and Suspended Sediment Characteristics of Tawa River during Low Flows—V. K. Choubey                                  | 497-503 |
