

# About the Editors

**B. Venkatesh**, Scientist, National Institute of Hydrology, Belgaum Regional Centre, Karnataka obtained his Master's degree in Hydraulics and Water Resources Engineering from Karnataka Regional Engineering College (presently NITK) Surathkal in the year 1991. His main areas of research include Forest Hydrology and rainfall-runoff modeling and flood frequency analysis. He has attended advanced training in surface water hydrology at University of Newcastle upon Tyne, England under UNDP assisted programmes. He has published number of research papers in national and international journals.

**B.K. Purandara**, Scientist, National Institute of Hydrology is presently serving at its Regional Centre, located at Belgaum, Karnataka. He obtained his PhD (with specialization in M. Geology) from Cochin University of Science and Technology, Kerala in the year 1991. His main areas of research include Forest Hydrology and Groundwater Quality. He attended advanced training in Soil Physics (CSIRO, Canderra, Australia) and in Forest Hydrology (University of Idaho, USA) through UNESCO and UNDP assisted programmes. He has published number of research papers in national and international journals.

**K.S. Ramasastri**, former Director, National Institute of Hydrology, Roorkee. He served at IMD, CWC before joining National Institute of Hydrology, Roorkee. He obtained his PhD (with specialization in Hydrology) in 1994. His main area of research includes, hydro-meteorology and drought studies. He has published number of research papers in national and international journals.
