R.D. Singh
K.D. Sharma

VOLUME–I

Hydrologic and Hydraulic Modelling

Organized by

National Institute of Hydrology, Roorkee
Ministry of Water Resources, Government of India
New Delhi–110 001

ALLIED PUBLISHERS PVT. LTD.

New Delhi • Mumbai • Kolkata • Lucknow • Chennai
Nagpur • Bangalore • Hyderabad • Ahmedabad

Contents

VOLUME–I: HYDROLOGIC AND HYDRAULIC MODELLING

Acknowledgements ..... *v*

Sponsors ..... *vi*

Preface ..... *vii*

SECTION–I
Rainfall

1. Making Forecasts of Extreme Rainfall and Managing their Consequences for Flood Forecasting 3
   Chris. G. Collier
2. The Influence of the Land Surface on Hydrometeorology and Ecology: New Advances from Modeling and Satellite Remote Sensing 16
   Seungbum Hong, Venkat Lakshmi, Eric E. Small and Fei Chen
3. Short-Term Rainfall Distribution in Space and Time Conditions in Southern Sweden 33
   Lars Bengtsson
4. A Review of Indian Rainfall 41
   P.R. Rakhecha and V.P. Singh
5. Condensed Disaggregation Procedure of Rainfall Using Conservation Corrections 57
   R. Subbaiah and Shashank Singh
6. An Assessment of Spatio-Temporal Representations in the Stochastic Generation of Daily Precipitation Sequences 64
   R. Mehrotra and Ashish Sharma
7. On Variability of Wet Season over Major River Basins of India 79
   Nityanand Singh, A.A. Ranade, H.N. Singh and N.A. Sontakke
8. Rainfall Prediction for Musi Reservoir Project Raingauge Station 93
   Rajesh Nune, Srinivas Pasupuleti and Sunil Raju Kurra
9. Design Raindepths for 1° × 1° Grid Over the Godavari-Krishna Basins in India 99
   B.D. Kulkarni, S. Nandargi and S.S. Mulye
10. Assessment of Mean Aerial Precipitation Estimation Methods on Natural Watersheds under Varying Geographic and Topographic Terrains across Canada 106
    U.S. Panu, Darryl Smaglinskie and Larry Pereira
11. Thiessen—Software for Automatic Estimation of Weighted Average Rainfall 122
    N. Panigrahy, S.K. Jain, Vijay Kumar and P.K. Bhunya
12. Geostatistical Analysis of Extreme Rainfalls of Andhra Pradesh, India 130
    B.R. Krishna Murthy and G. Abbaiah
13. Prediction of Rainfall in West Bengal for the Next Two Years 144
    J. Pal Choudhury and Kalyan Chakrabrty

SECTION–II

Infiltration and Evapotranspiration

14. Pore-Scale Analysis Using Mathematical Morphology to Obtain Soil Hydraulics Properties 153
T.P. Chan and Rao S. Govindaraju

15. Evapotranspiration in Hydrological Modeling 163
C.-Y. Xu and V.P. Singh

16. Comparison of Newly Proposed "Copais Approach" and Traditional Reference Evapotranspiration Equations in a Small Catchment 176
Renji Remesan, Muhammad Ali Shamim and Dawei Han

17. Determination of Unsaturated Soil Parameters from Infiltration Experiment Using Inverse Procedure 184
P.N. Chandramouli, K.S. Hariprasad, C.S.P. Ojha and Talari Venkata Gopal

18. Effective Soil Hydraulic Parameter Estimation at Different Spatial Scales 188
Binayak P. Mohanty, Narendra N. Das, Raghavendra B. Jana and Amor V.M. Ines

19. Assessment of Evapotranspiration Estimation Methods in a Semi Arid Region 197
U.M. Khodke and H.G. Gundekar

20. Infiltration Processes and Soil Moisture Dynamics 205
Salvatore Manfreda, Kelly K. Caylor and Todd M. Scanlon

SECTION–III

Surface Runoff

21. Application of Shallow Water Equations Models for Water Hazards Problems 217
Koichi Unami, Toshihiko Kawachi and Ayako Miyauchi

22. A State-of-the-Art of the SCS-CN Methodology 223
P. Suresh Babu, S.K. Mishra and Vijay P. Singh

23. Dam Break Flood Simulation in Natural Floodplain Topography with 1D and 2D Numerical Models 240
Mimi Das Saikia and Arup Kumar Sarma

24. Artificial Neural Network Modelling of Tawi River Basin 245
Avinash Agarwal, Tanveer Ahmad and R.D. Singh

25. Rainfall Runoff Modelling Using Fuzzy Rule Based Approach 257
A.K. Lohani, N.K. Goel and K.K.S. Bhatia

26. Predicting Varied Kinematic Roughness Parameter during Storm Durations under Ungauged Catchment Situations 264
M.L. Gaur and B.S. Mathur

27. Modeling Urban Flooding from Storm Sewers Using Dynamic Wave Theory 275
Biswajit Mukhopadhyay, Aniruddha Dutta, Fariborz Nouri and Chitranjan Kaushik

28. Numerical Modeling for Floodway Assessment—A Case Study 290
U.S. Panu, Dominic McKenna and Daniel Tomlinson

29. Development of Interface for Daily Runoff Assessment from a Watershed 304
K.A. Dhore, D. Khare, U.C. Chaube and P.K. Garg

30. Quantification of Urban Runoff Reaching to the Upper Bhopal Lake, M.P., India 308
Vijay K. Dwivedi, C.S.P. Ojha and V.K. Choubey

31. Modeling Rainfall-Runoff Process Using Grey System Theory with Two Solution Procedures 317
Harsh V. Trivedi and J.K. Singh

32. Genetic Algorithm Based Unit Hydrograph 323
R.K. Rai, H.G. Gundekar, S. Sarkar and B.S. Mathur

33. Impacts of Urbanization on Streamflow 329
Ramesh P. Rudra, Trevor Dickinson and Syed I. Ahmed

34. The Development of a Flood Risk Model for Romania 347
Murthy Bachu, Kunal Jadhav and Viorel Chendes

35. Mathematical Model of River Mandarmani, Purba Midnapore—A Case Study 355
Dyuti Prasad Dolai and Shyamal Kumar Roy

36. Experimental Evidences on the Run-on Process 356
Corrado Corradini, Renato Morbidelli, Carla Saltalippi, Alessia Flammini and Rao S. Govindaraju

SECTION–IV

Snow and Glacier Hydrology

37. Melt-Runoff Delaying Characteristics of Gangotri Glacier 359
Manohar Arora, R.D. Singh, Amit Kumar and Pratap Singh

38. Role of Snow and Glacier Melt Runoff Modelling in Hydropower Projects in the Himalayan Region 366
Pratap Singh, Larry Polglase and David Wilson

39. Estimation of SWE and Surface Energy Balance for a Snow Cover in Pir-Panjal Range of N-W Himalaya 372
Prem Datt, Pooja, P.K. Srivastava and P.S. Negi

40. Snow Harvesting for Drinking and Irrigation Water: A Case Study 378
P.S. Negi, D.N. Sethi and P. Mathur

41. Suspended Sediment Transfer in a Himalayan Headwater Stream: Glacier *vs* Monsoon 385
Renoj J. Thayyen, J.T. Gergan and D.P. Dobhal

42. Rainfall Contribution in Bhagirathi River near Gangotri Glacier Snout, Gomukh, Western Himalayas, India, Using Stable Isotope 392
S.P. Rai, Bhishm Kumar and Pratap Singh

SECTION–V

Ground Water

43. Development *versus* Sustainable Development of Ground Water Resources in Indian Context 401
S.N. Rai

44. A Protocol for Groundwater Recharge Capability Assessment Using Multi-Thematic Parameters: An Example from a Semi-Arid Region of Rajasthan, India 417
S. Sinha-Roy

45. Forecasting Spatiotemporal Water Levels of Tabriz Aquifer 425
V. Nourani, A.A. Moghaddam, A.O. Nadiri and V.P. Singh

46. Analysis of Natural Recharge and Groundwater Dynamics in Alluvial Aquifer Systems 436
Madan K. Jha, T. Roshni and Yasunori Kamii

47. Modeling of Groundwater Flow in Part of Western Yamuna Canal Command, Haryana 443
Vijay Kumar, M.K. Goel, K.J. Anandhakumar and P. Das

48. Flow Simulation through Multiple Leaky Aquifers 451
A.K. Sahu and B.C. Mal

49. A Factor Analytic Model for Delineating Groundwater Source Areas 457
O.P. Dubey and Krishna Kumar

50. Characteristics of Groundwater Hydrographs in Diverse Hydrogeological Setup of Madhya Pradesh, India 461
Anu Radha Bhatia and R.M. Verma

51. Impact of Water Harvesting on Groundwater Recharge, Productivity and Net Returns with Integrated Farming Systems Approach in Eastern Dry Zone of Karnataka 472
N. Nagaraj, M.G. Chandrakanth and R. Prathima

52. Estimation of Partially Penetrated Aquifer Parameters from Pumping Test Data by Genetic Algorithm Optimization Technique 481
S.A. Alemayehu, K.S. Hari Prasad and C.S.P. Ojha

53. Seawater Intrusion into Coastal Aquifer: A Case Study from Puri District, Orissa 486
Radhamohan Das, D.C. Singhal and D. Kashyap

54. Groundwater Appraisal of the Uma River Basin, Akola District, Maharashtra with Reference to Environmental Management 495
S.F.R. Khadri

55. Rejuvination of Natural Springs of Uttarakhand 496
A.K. Vashisht, H.C. Sharma and Vinod Kumar

56. Hydrogeological Characteristics of Backfilled Opencast Coal Mines 497
Biswajit Paul

57. Estimation of Artificial Recharge through Defunct Dug-Well: A Case Study in Semi-Arid Region of South India 498
P.D. Sreedevi, A. Nabi, S. Ahmed, J. Perrin and B. Dewandel

SECTION–VI

Watershed Modeling

58. Three Dimensional River Basin Simulation with Distributed Runoff Model for Water Quantity and Quality 501
Toshiharu Kojiri and Amin Ismael Amin Nawahda

59. History and Perspectives of Hydrological Catchment Modelling 512
E. Todini

60. Modelling Effects of Rural Land Management on Flood Risk 524
H.S. Wheater, N. McIntyre and B.M. Jackson

61. Continuous Simulation Model for Hydrologic Forecasting Based on Modified SCS-CN Concept 530
K. Geetha, T.I. Eldho, A.K. Rastogi and S.K. Mishra

62. Catchment Classification and Predictions in Ungauged Basins 543
Thorsten Wagener

63. Challenges in Hydrological Modelling—Simplicity *vs.* Complexity 549
A.W. Jayawardena
