

CHAPTER CONTENTS

| <i>Chapter No.</i> | <i>Title</i> | <i>Page</i> |
|------------------------|--|-------------|
| 1. | Use of Defined Rating Curve Methods | 1-10 |
| 2. | Methods of Developing Rating Curves | 11-31 |
| 3. | Flood frequency analysis Techniques | 32-44 |
| 4. | Geomorphological parameters using Remote Sensing and GIS | 45-59 |
| 5. | Development of Regional Flood Frequency Relationships | 60-71 |
| 6. | Development of Regional Flow Duration Curves for Ungauged Basins | 72-83 |
| 7. | Design Storm Analysis | 84-92 |
| 8. | Regional Unit Hydrograph Analysis | 93-117 |
| 9. | Drainage Basin Characteristics and GIUH Approach for Ungauged Catchments | 118-134 |
| 10. | Risk & Reliability in flood estimation | 135-143 |
| 11. | Application of Time Series Analysis in Stream Flow Forecasting | 144-163 |
