## **Activities of INCOH**

### **Sponsorship of Research/Applied Projects**

INCOH provides sponsorship to research and development projects to fulfil its following objectives:

- To conduct studies and research using available technology.
- To develop new technology and methodologies for application to real life problems.
- To develop hydrological instruments indigenously and to evaluate new techniques.
- To develop new software for application in field hydrological problems.
- To give impetus to hydrological education and training.

About 48 research projects from different parts of the country have been sponsored upto now. The funding for various projects has been provided under the following ten broad areas:

- Hydrology of surface water (rivers, lakes and reservoirs) including snow and glaciers.
- Remote sensing applications to hydrology and water resources.
- Hydrological information system and computers in hydrology.
- Hydrological instrumentation and telemetry.
- Environmental hydrology
- Hydrometeorological aspects of water resources development and flood forecasting.
- Ground water, springs, conjunctive use, drainage and water re-use.
- Drought, water conservation and evaporation control.
- Nuclear applications.
- Education and training in hydrology.

### **Organisation of National Symposium on Hydrology**

INCOH organises at least one national seminar/symposium every year to bring together hydrologists and water resources engineers from various parts of India. Since 1987, INCOH has been organising such National Seminars every year on specific focal themes.

### **Sponsorship of Seminar/Symposia/Conferences/Short-term Courses**

INCOH provides sponsorship to various agencies and organizations for organising national, regional and international events in hydrology.
