**Activities of INCOH**

**Sponsorship of Research/Applied Projects**

INCOH provides sponsorship to research and development projects to fulfil its following objectives:

- To conduct studies and research using available technology.
- To develop new technology and methodologies for application to real life problems.
- To develop hydrological instruments indigenously and to evaluate new techniques.
- To develop new software for application in field hydrological problems.
- To give impetus to hydrological education and training.

Seventy three research projects from different parts of the country have been sponsored upto now. The funding for various projects has been provided under the following subject domain:

Meteorology., Surface Water Hydrology, Evaporation Control., Instrumentation., Real Time Systems., Application of GIS and Remote Sensing.

**Organisation of National Symposium on Hydrology**

INCOH organises at least one national seminar/symposium every alternate year to bring together hydrologists and water resources engineers from various parts of India. Since 1987, INCOH has been organising such National Symposia/Seminars every year on specific focal themes.
